

Signal Transmission Coaxial Cable

Coaxial cable designed for reliable signal transmission. It features a durable black outer jacket, internal insulation, and multiple conductors including a central core and braided shielding.

Product Overview

High-Performance Signal Transmission

This coaxial cable is engineered for reliable and secure signal transmission across various professional applications. Featuring a robust construction with a durable black outer jacket, it includes advanced internal insulation and multi-layered shielding. The design incorporates a central core and braided shielding to ensure efficient data transfer and signal integrity.

Construction Details

Cable Composition

- Durable black outer jacket
- Internal insulation layer
- Central core conductor
- Braided shielding
- Insulated secondary wires

Key Features

Shielded • Durable Jacket • High-Reliability

Application

Application Suitability

Data Transfer, Signal Transmission, Professional Infrastructure
