

Silent Diesel Generator 220V 50Hz

This silent diesel generator is designed for reliable power generation. It features a robust diesel engine, providing a stable 220V AC output at 50Hz.

Overview

Professional Silent Power Solution

The EM6500SE is a high-performance silent diesel generator engineered to provide consistent and stable power in noise-sensitive environments. Designed for reliability, this unit delivers a standard 220V/50Hz output, making it ideal for industrial or commercial backup applications. It features advanced monitoring tools and multiple safety protections to ensure long-term operational efficiency and ease of use.

Technical Specifications

Core Performance

220 V AC Voltage	50 Hz Frequency	8.3 A DC Output Current
----------------------------	---------------------------	-----------------------------------

Model Name	EM6500SE
------------	----------

Features & Safety

Monitoring Components

- Digital Voltmeter
- Oil Alert Lamp
- Start/Stop Switch

Design Features

Silent Enclosure • Wheel-mounted • Portable

Safety Protections	Oil Alert Lamp, Circuit Breakers, DC Fuse, Low Oil Pressure Warning
--------------------	---

Operational Details

Output Ports

Output Type	Specification
AC Output	220V
DC Output	12V
DC Current	8.3A
