

# Silent Diesel Generator, 9-60 kVA

This diesel generator provides reliable power with a four-stroke-cycle diesel engine for consistent performance and fuel economy. It features a sound attenuation enclosure for reduced noise levels, making it suitable for various applications.

## ADDITIONAL IMAGES

## Overview

### Silent Diesel Generator Series

This series of silent diesel generators offers a versatile power range from 9 to 60 kVA, designed for both prime and standby applications. Engineered for quiet operation, these units feature robust construction and sound-attenuated enclosures, making them ideal for industrial, commercial, and residential environments where noise reduction is critical. With advanced cooling systems and high-efficiency alternators, they provide reliable performance even in challenging ambient temperatures up to 50°C.

## Performance Metrics

### Power Output Range

**9 kVA**

Minimum Output

**60 kVA**

Maximum Output

## Technical Specifications

Max Ambient Temperature	50 °C
Protection Class	IP23
Compliance Standards	ISO8528-5, NFPA 110

## Certifications

### Quality & Environmental Certifications

ISO9001 • CE • ISO14001 • OHSAS18000
