Overview

Industrial-Grade Silent Power Solutions

This high-performance silent diesel generator series offers versatile power output ranging from 25kVA to 3125kVA, designed for demanding industrial and commercial environments. Engineered for reliability and low-noise operation, these units are suitable for critical applications including telecommunications, banking, healthcare facilities, and heavy industry. Each system is built with high-quality components to ensure long-term durability and consistent performance across diverse global power grids.

Technical Specifications

Power Capacity Range

25 kVA

Minimum Capacity

3125 kVA

Maximum Capacity

Electrical Components

- 24V charge alternator
- Dry type air filter
- Fuel filter
- Oil filter
- Main line circuit breaker
- Standard control panel

Cooling System

Radiator 50°C max with belt-driven fans and safety guard

Alternator Specifications

Single bearing, IP23 protection, insulation class H/H

Certifications & Compliance

Certifications

CE, ISO

Service & Warranty

Service Scope

- Global warranty support
- Technical consulting and planning
- Installation and debugging guidance
- Equipment room design assistance
- Regular inspection and maintenance

Warranty Period

1 year or 1000 running hours (whichever comes first)
