Product Overview

Professional Silent Diesel Generator Sets

These professional-grade, water-cooled diesel generator sets are engineered for exceptional reliability across industrial, military, and marine applications. Featuring highly intelligent digital control systems, they support advanced remote monitoring, group control, and automatic fault protection. Built for endurance, these units maintain rated power output at altitudes up to 1000m and offer reliable performance with low noise, low emissions, and superior fuel efficiency.

Performance Specifications

Power Output Range

41 KVA

Minimum KVA

2035 KVA

Maximum KVA

Overload Capability

110% rated power for 1 hour

Technical Details

Engine Cylinder Configuration

- 4-Cylinder models
- 6-Cylinder models
- 12-Cylinder models

Industry Standards

ISO 8528 • ISO 3046 • GB/T 2820 • CE • EPA

Supported Voltages

400/230V, 240/415V, 220/380V, 127/220V

Operational Features

Core Features

- Intelligent digital control system
- Remote computer and telemetry capabilities
- Automatic fault protection
- Low noise and low vibration design
- High fuel and lubrication oil efficiency
