

Silicon Carbide Abrasive Cloth Roll

Silicon carbide abrasive cloth roll is designed for grinding, sanding, and polishing. Its durable cloth backing offers flexibility and tear resistance on metal, wood, and plastic.

Product Overview

Silicon Carbide Abrasive Cloth Roll

This silicon carbide abrasive cloth roll is engineered for professional grinding, sanding, and polishing applications. It features a durable cloth backing that provides excellent flexibility and tear resistance, ensuring reliable performance during extended use. Designed for versatility, this abrasive is suitable for a wide range of materials including metal, wood, and plastic, making it an ideal choice for both manual hand sanding and machine-assisted operations.

Technical Specifications

Applications

- Grinding
- Sanding
- Polishing

Abrasive Material	Silicon Carbide
