

Silicon Carbide Abrasive Paper

This abrasive paper is made with silicon carbide and has a close coat. It is designed for heavy-duty grinding and is suitable for use on MDF, glass, ceramic, rubber, and stone.

Product Overview

Silicon Carbide Abrasive Paper (PC139G)

The PC139G Silicon Carbide Abrasive Paper is an industrial-grade sanding material engineered with advanced technology for consistent performance. Featuring a durable G-weight paper backing and a robust resin-over-resin bonding system, this abrasive is designed to handle demanding sanding applications. It offers a versatile grit range and is available in both roll and belt formats to suit various manufacturing and workshop requirements.
