

Silicon Carbide Abrasive Sandpaper for Wet and Dry Sanding

Silicon carbide abrasive paper is designed for both wet and dry sanding applications. It is suitable for achieving a smooth finish on metal, wood, plastic, and painted surfaces.

Product Overview

Professional Grade Silicon Carbide Sandpaper

This high-quality silicon carbide abrasive paper is engineered for versatility, supporting both wet and dry sanding applications. Constructed with durable latex paper backing, it is designed for consistent performance across various surfaces including metal, wood, and automotive finishes. Ideal for demanding professional environments, it ensures a smooth, uniform finish for your processing and decoration needs.

Technical Specifications

Grit Range	60#, 3000#
Backing Material	Latex paper
Paper Weight	120 g
Abrasive Material	Silicon Carbide

Usage & Packaging

Scope of Application

- Building construction
- Automotive processing
- Wood products
- Electrical machinery processing

Packaging Quantity

1000 pcs

Sheets per box

Sanding Method

Wet Sanding • Dry Sanding
