

Silicon Carbide Deburring Wheel 6 x 1 x 1 Inch

This silicon carbide deburring wheel is 6 inches in diameter with a 1-inch thickness and 1-inch arbor hole. It is suitable for deburring, edge breaking, and surface preparation.

Product Overview

High-Performance Deburring Solution

This silicon carbide deburring wheel is engineered for efficient material removal and precise surface finishing. Designed with a 6-inch diameter and 1-inch thickness, it offers consistent performance and long-lasting durability for industrial applications. It is an ideal tool for deburring, edge breaking, and surface preparation tasks on a wide range of materials.

Physical Dimensions

Diameter	6 inch
Thickness	1 inch
Arbor Hole	1 inch

Material & Compatibility

Suitable For

- Gray cast iron
- Non-ferrous metals
- Non-metallic materials
- Stone
- Ceramics
- Glass
- Refractories
- Silicate materials

Abrasive Material	Black Silicon Carbide
Primary Applications	Deburring, Edge Breaking, Surface Preparation, Grinding
