

Silicon Carbide Waterproof Abrasive Paper

This silicon carbide abrasive paper is designed for wet sanding. It delivers excellent cutting performance and durability when used with water or lubricants.

Product Overview

Professional Abrasive Solution

This silicon carbide waterproof abrasive paper is specifically engineered for precision wet sanding applications. It features a high-performance abrasive bonded to a durable, waterproof backing to ensure consistent results across various substrates. By utilizing water or lubricants, it effectively prevents clogging and significantly extends the service life of the abrasive compared to standard dry options.

Technical Details

Compatible Materials

- Metal
- Wood
- Plastic
- Painted surfaces

Abrasive Material	Silicon Carbide
Application Method	Wet Sanding, Fine Finishing

Features

Key Performance Benefits

Waterproof Backing • Anti-Clogging • Extended Durability • Consistent Cutting
