Product Overview

Professional Grade RTV Gasket Maker

This high-performance RTV silicone gasket maker is designed to form custom-fit gaskets for any size or shape, providing a robust seal resistant to high temperatures and pressures. Its advanced formulation resists cracking, shrinking, and migration caused by thermal cycling, ensuring long-term reliability. Ideal for automotive and industrial maintenance, it effectively seals components such as valve covers, oil pans, intake manifolds, and water pumps.

Technical Specifications

Temperature Resistance

-80 °F

Minimum Temperature

590 °F

Maximum Temperature

Available Colors

Black • Red • Grey • Blue • White

Net Weight

100 g

Application Details

Typical Applications

- Water pumps
- Valve covers
- Oil pans
- Intake manifolds
- Exhaust manifolds
- Thermostat housings
- Exhaust crossover pipes

Resistant To

Oil, Water, Antifreeze
