

Silicone Structural Glazing Sealant

This silicone sealant is specifically designed for structural glazing and curtain wall applications. It provides excellent adhesion to a variety of materials, as well as weather and UV resistance.

Product Overview

High-Performance Structural Glazing Sealant

This neutral-cure silicone sealant is engineered specifically for structural glazing and curtain wall systems. It offers excellent adhesion across diverse substrates including glass, aluminum, and concrete, ensuring long-term structural integrity. Designed for demanding environments, the formula provides superior UV stability and weather resistance.

Technical Specifications

Curing System	Neutral-cure
Packaging Volume	300 mL
Shelf Life	10 months

Application

Primary Applications

- Structural glazing
- Curtain wall systems

Compatible Substrates	Glass, Aluminum, Concrete
-----------------------	---------------------------

Performance Features

Key Performance Attributes

UV Stable • Weather Resistant • Durable
