

Silver Ball Grill Dynamic Microphone

This dynamic microphone features a silver ball grill and a painted metal body. It is designed for vocal and speech applications and offers an integrated on/off switch.

Product Overview

Professional Performance Microphone

The PT-710 is a robust dynamic microphone featuring a durable zinc alloy body with a smooth, abrasion-resistant paint finish. Engineered with a heat-treated brazing metal net for impact protection, it provides reliable performance in demanding environments. This microphone delivers a balanced acoustic profile with powerful bass, mellow alto, and clear treble, making it an ideal choice for live shows, karaoke, and public speaking.
