

SIM Card Data Backup Device

This compact device allows users to back up and copy contact lists from SIM cards. It has a save capability of 8KB, which can accommodate up to 250 phone records.

Product Overview

Data Protection for Mobile Users

The SIM Card Backup device offers a reliable, standalone solution for archiving and protecting contact lists. It allows users to copy and store data independently without requiring a PC or PDA connection. With the ability to transfer records across different SIM cards, countries, and service providers, it ensures your essential information remains secure and accessible.
