

Single-Acting Hydraulic Cylinder Jack

This single-acting hydraulic cylinder jack features a spring return. It is designed for use in tight spaces where a high lifting force is required.

Overview

High-Performance Hydraulic Lifting Solution

The RCH-10075 is a robust, single-acting hydraulic jack engineered for professional lifting, pushing, and spreading applications. Featuring a hollow plunger design and high-grade construction, this tool is ideal for demanding industrial environments requiring precise force. Its compact build makes it perfect for use in confined spaces where reliability and safety are paramount.
