

Single Axle Utility Trailer with Hydraulic Tipping

This single axle trailer features a hydraulic tipping mechanism for efficient unloading. Equipped with four durable tires and a sturdy steel frame, it ensures stability and smooth transport of materials for heavy-duty applications.

Overview

Robust Utility Solution

This single axle utility trailer is engineered for heavy-duty applications in both agricultural and construction environments. It features a reliable hydraulic tipping mechanism designed for efficient, controlled, and precise unloading of materials. Built with a sturdy steel frame and reinforced sidewalls, this trailer ensures secure containment and long-lasting performance under demanding conditions.

Technical Specifications

Axle Configuration	Single Axle
Tire Count	4
Tipping System	Hydraulic

Features

Key Features

- Hydraulic tipping mechanism
- Reinforced sidewalls
- Adjustable hitch
- Heavy-duty steel frame

Maintenance

Easy Maintenance

Suitable Applications	Agriculture, Construction, Material Transport
