

Single Axle Utility Trailer with Hydraulic Tipping

This single-axle, two-wheel trailer is designed for versatile hauling applications. Its hydraulic tipping mechanism allows for easy unloading of materials.

Overview

Versatile Hydraulic Utility Trailer

The 7CX-3X is a robust single-axle, two-wheel trailer engineered for demanding hauling applications in agriculture, construction, and landscaping. It features a reliable hydraulic tipping mechanism that allows for effortless unloading of heavy materials, significantly increasing operational efficiency. With its durable steel construction and heavy-duty tires, this trailer provides the stability and longevity required for intensive daily use.

Technical Specifications

Axle Configuration	Single Axle
Tipping Mechanism	Hydraulic
Materials	Steel Construction, Heavy-duty Tires
