

# Single-Axle Walking Tractor for Agriculture

This walking tractor is designed for agricultural use, featuring a single-axle configuration. It is equipped with robust tires for optimal traction and a user-friendly control system.

## Overview

### Professional Agricultural Utility

The SN131 series walking tractor is a versatile, single-axle machine engineered for essential agricultural tasks including tilling and plowing. Its compact design and robust tire configuration ensure optimal traction and maneuverability, making it an ideal solution for small to medium-sized farming operations. Designed for efficiency, this unit provides reliable performance in diverse field conditions.

## Technical Specifications

### Configuration

Single-Axle • Walking Tractor

### Series Model

SN131

## Applications

### Primary Agricultural Uses

Tilling, Plowing, General Farm Tasks
