

Single Bag Filter Housing

This single bag filter housing is constructed from either stainless steel 304 or 316L. It is designed for efficient removal of particulate matter from liquids in industrial applications.

Product Overview

KGD Series Single Bag Filter Housing

The KGD Series Single Bag Filter Housing is a robust, high-quality stainless steel filtration solution engineered for demanding industrial environments. Designed to accommodate a single filter bag, it provides efficient particulate removal while ensuring durability and corrosion resistance. Its user-friendly design facilitates quick bag replacement to minimize operational downtime, making it a reliable and cost-effective choice for maintaining fluid purity across diverse applications.

Technical Specifications

Construction Material	Stainless Steel
Filter Capacity	Single Bag
Key Features	Corrosion Resistant, Easy Maintenance, Leak-proof Closure, Industrial Grade

Applications

Suitable Industries

- Water Treatment
- Chemical Processing
- Food and Beverage Production
