

# Single Blade Labyrinth Drip Irrigation Tape

This labyrinth drip irrigation tape utilizes plastic pipe to deliver water to plant roots through small drip holes. Water is distributed evenly and slowly into the soil near the crop's root zone.

## ADDITIONAL IMAGES

## Product Overview

### Efficient Labyrinth Irrigation

This single blade labyrinth drip irrigation tape is a high-performance solution for precision agriculture. By utilizing a specialized labyrinth runner design, it creates turbulent flow to ensure uniform water delivery directly to crop root zones. The system is engineered for water-saving efficiency, reaching up to 95% utilization rates, making it ideal for arid regions, greenhouse cultivation, and row crops.

## Technical Specifications

### Outlet Spacing

- 100
- 150
- 200
- 250
- 300

Diameter	12mm, 16mm, 20mm
Wall Thickness	0.18 - 0.22 mm
Flow Rate	1 - 6 L/H
Working Pressure	1 bar

## Logistics

Roll Length	2000 meters
Minimum Order Quantity	10000 meters
Delivery Date	5 working days

## Key Features

### Performance Highlights

**95 %**

Water Utilization

**80 meters**

Max Paving Length

### Why Choose This Tape

High Anti-Block Function, UV Resistant, Mechanized Paving Compatible, Corrosion Resistant, Lightweight
