

Single-Cell Stainless Steel Vacuum Packaging Machine

This single-cell vacuum packaging machine is constructed from stainless steel. It ensures optimal preservation and protection of packaged goods through reliable and consistent vacuum sealing.

Overview

Professional Vacuum Packaging Solution

This single-cell vacuum packaging machine features a durable 304 stainless steel construction, making it ideal for maintaining high hygiene standards in industrial environments. Designed with a unique tilt-table configuration, it prevents moisture loss, making it highly effective for packaging products with high water content. The unit utilizes a Japanese-engineered micro-computer control system to ensure reliability, ease of operation, and long-term performance.

Technical Specifications

Available Models	DTDZ400B/1, DTDZ500B/1, DTDZ600B/1
Material	304 Stainless Steel
Control System	Micro-computer controller (Japanese circuit)

Key Features

Durability Ratings

Waterproof • Moisture-proof • Low failure rate • Food grade

Usage

Compatible Packaging Materials

- Plastic composite film
- Aluminum foil composite film

Suitable Product States

- Solid
- Powder
- Paste
- Liquid
