

Single Chainring Bicycle Crankset

This bicycle crankset features a single chainring design with an integrated crank arm. It is suitable for single-speed or internally geared hub bicycles, emphasizing simplicity and lightweight construction.

Product Overview

High-Performance Single Chainring Crankset

This single chainring bicycle crankset is engineered for efficiency and simplicity, making it an ideal choice for single-speed setups or bicycles equipped with internally geared hubs. Featuring a robust metallic crank arm paired with a specialized, high-visibility chainring, this component balances lightweight construction with reliable power transfer. Its streamlined design reduces mechanical complexity, offering a clean aesthetic and dependable performance for urban and commuter cycling applications.

Technical Specifications

Compatibility

- Single-speed bicycles
- Internally geared hub bicycles

Design Highlights

Integrated Crank Arm • Lightweight Construction • Simplified Drivetrain

Crankset Type

Single Chainring

Material Composition

Aluminum Alloy, Polycarbonate/Acrylic
