

Single Channel Car Audio Amplifier

High power car amplifier designed for single channel operation. Features include robust construction, efficient heat dissipation, and stable performance. Ideal for enhancing audio systems in vehicles.

Product Overview

High-Performance Single Channel Audio Solution

This single channel car audio amplifier is engineered for high power output and stable performance in demanding vehicle environments. It features a robust construction designed for efficient heat dissipation, ensuring reliability during extended use. Ideal for professional audio upgrades, this 800W unit provides the power necessary to significantly enhance any vehicle's sound system.

Technical Specifications

Maximum Power

800 W

Peak Power

Channels

1

Model Identifier

GA1250

Key Features

Core Features

- High power amplification
- Single channel operation
- Efficient heat dissipation design
- Robust chassis construction
- Stable performance output

Best For

Car Audio, Vehicle Upgrades, High Power Systems
