

Single Crystal Corundum Grinding Wheel

This grinding wheel is made from single crystal corundum. It is suitable for grinding and polishing ferrous and non-ferrous metals, ceramics, and composites.

Product Overview

High-Precision Grinding Solution

This single crystal corundum grinding wheel is engineered for demanding industrial environments, providing exceptional durability and high material removal rates. Designed for versatility, it is suitable for grinding and polishing a wide range of materials, including ferrous and non-ferrous metals, ceramics, and composites. With a focus on consistent performance, this wheel serves as a reliable tool for high-precision manufacturing applications.

Technical Specifications

Suitable Materials

- Ferrous metals
- Non-ferrous metals
- Ceramics
- Composites

Dimensions	900mm x 34mm x 1mm
Abrasive Material	Single Crystal Corundum

Performance Metrics

Core Advantages

1 High

Material Removal Rate
