

Single Cup Coffee Maker for K-Cups

This single-cup coffee maker is designed for use with K-Cups and ground coffee. It features one-touch control with illumination and auto shut-off after brewing.

Product Overview

Compact Single-Serve Brewing

This single-cup coffee maker is designed for efficiency and ease of use in professional or home office environments. It features a versatile brewing system compatible with both K-Cups and ground coffee, delivering a consistent 10 oz serving size. With its compact footprint, one-touch operation, and safety features like an auto-shutoff and retractable probe, it is an ideal solution for quick, hassle-free coffee preparation.
