

Single-Cylinder 15 HP Diesel Engine

This single-cylinder, horizontal diesel engine is designed for varied applications. With a 115mm bore and 120mm stroke, it delivers 15 hp at 2200 rpm.

Product Overview

Robust Single-Cylinder Diesel Power

The SH1115 is a high-performance single-cylinder horizontal diesel engine engineered for reliability in demanding environments. Delivering a rated power of 15 HP, this engine provides consistent torque and durability for continuous operation. Its versatile design makes it an ideal power solution for agricultural machinery, small-scale power generation, and water pump systems.

Technical Specifications

Performance Metrics

15 HP Rated Power	2200 rpm Rated Speed	1.24 L Displacement
