

Single-Cylinder 150-200cc Gasoline Engine

This internal combustion engine is designed for industrial applications. It features a four-stroke configuration optimized for fuel efficiency and durability.

Overview

Robust Single-Cylinder Engine

The JL162FMJ is a reliable internal combustion engine engineered for a wide range of industrial and machinery applications. Featuring a four-stroke, single-cylinder configuration, this unit is optimized for consistent performance, fuel efficiency, and long-term durability. It is a versatile power solution suitable for integration into motorcycles, generators, water pumps, and other small-scale industrial equipment.

Technical Specifications

Displacement

150 cc

Min Displacement

200 cc

Max Displacement

Cooling System

Air-cooled

Engine Type

Single-cylinder, 4-stroke

Starting Options

Manual Start, Electric Start

Applications

Suitable Applications

- Motorcycles
- Generators
- Water pumps
- Small machinery
