

# Single-Cylinder 4-Stroke Gasoline Engine

This single-cylinder, 4-stroke gasoline engine features a recoil starter and overhead valve (OHV) design. Its compact and lightweight construction makes it suitable for generators, pumps, and other power equipment.

## ADDITIONAL IMAGES

## Overview

### Compact Power Solution

This single-cylinder, 4-stroke gasoline engine is engineered for versatility and reliability in portable power applications. Featuring an overhead valve (OHV) design and a compact, lightweight construction, it is optimized for efficient fuel consumption and consistent performance. It serves as an ideal power source for equipment such as generators and water pumps.

## Technical Specifications

Engine Configuration	Single-cylinder, 4-stroke
Valve Design	Overhead Valve (OHV)
Starter Mechanism	Recoil Starter

## Performance Metrics

Model Identifier	EH092D
Displacement Capacity	3 cc

## Applications

Suitable Applications	Generators, Water Pumps, Portable Power Equipment
