

Single-Cylinder Air-Cooled 4-Stroke Engine

The KB154F engine is a robust and reliable power source designed for a variety of applications. This engine features a single-cylinder, air-cooled, 4-stroke design, ensuring efficient operation and longevity.

Overview

Reliable Power Solution

The KB154F is a robust and reliable single-cylinder, air-cooled, 4-stroke engine engineered for consistent performance. Its compact design facilitates easy integration into various small machinery setups, making it an ideal power source for generators and water pumps. Designed for efficiency and longevity, this engine features a dependable recoil starter and a durable fuel tank for extended operation.

Technical Specifications

Engine Type	Single-cylinder, 4-stroke
Cooling System	Air-cooled
Starting System	Recoil starter

Key Features

Design Benefits

Compact Design • Durable Fuel Tank • Efficient Operation

Typical Applications	Generators, Water Pumps, Small Machinery
