

# Single-Cylinder Diesel Engine - 18 HP, 2200 RPM

This single-cylinder diesel engine produces a maximum of 18 horsepower at 2200 RPM. Its compact size and sturdy construction ensure durability and long-lasting performance, making it suitable for powering agricultural machinery, generators, and water pumps.

## Overview

### Robust Single-Cylinder Performance

The S1100 single-cylinder diesel engine is a reliable and efficient power solution designed for demanding environments. With a maximum output of 18 HP at 2200 RPM, it provides consistent power for agricultural machinery, water pumps, and small construction equipment. Its cast-iron construction ensures long-lasting durability, while the simple design allows for easy maintenance and fuel-efficient operation.

## Technical Specifications

Model	S1100
Engine Type	Single-Cylinder Diesel
Block Material	Cast Iron

## Features

Key Features	Fuel Efficient, Easy Maintenance, Compact Design, Air Cleaner Equipped
--------------	--

## Application

### Suitable Applications

- Agricultural Machinery
- Power Generators
- Water Pumps
- Small Construction Equipment
