

# Single-Cylinder Diesel Engine 22.1kW

This is a single-cylinder diesel engine with a 22.1 kW 1-hour output. It offers easy starting, rapid acceleration, stable performance, enhanced power, and low fuel consumption.

## Product Overview

### High-Performance Single-Cylinder Diesel Engine

This powerful single-cylinder diesel engine is designed for high-efficiency performance with a 22.1 kW 1-hour output. It features a patented design optimized for easy starting, rapid acceleration, and stable operation under various loads. Built for durability and low fuel consumption, it is an ideal power source for professional industrial and agricultural applications.

## Performance Metrics

### Performance Highlights

**22.1 kW**  
1-Hour Output

**20.1 kW**  
12-Hour Output

**2200 r/min**  
Rated Speed

## Technical Specifications

Engine Model	ZS1130
Net Weight	230 kg

## Key Features

### Operational Advantages

- Easy starting mechanism
- Rapid acceleration capabilities
- Stable performance under load
- Enhanced power output
- Low fuel consumption
- Durable construction

### Design Features

Patented Design • Single-Cylinder • High Torque

## Safety & Maintenance

Safety Considerations	High Speed Warning, Steam Scalding Protection, Maintenance Required
