Product Overview

Reliable Single-Cylinder Power

The R175 is a robust, single-cylinder four-stroke diesel engine engineered for high efficiency and long-term durability. It features a water-cooled design that ensures optimal temperature management under demanding operational conditions. Designed for versatility, it serves as a dependable power source for agricultural machinery, small-scale power generation, and water pump systems.

Technical Specifications

Rated Power Output

7.5 HP

Power Output

Configuration	Single-cylinder, four-stroke
Cooling Method	Water cooled
Displacement	400 cc

Features

Core Advantages	Water Cooled, Direct Injection, Compact Design, Easy Maintenance
-----------------	--

Applications

Typical Applications

- Agricultural machinery
- Small generators
- Water pump systems
- Industrial equipment
