

Single-Cylinder Diesel Engine, 4-6 HP

The 165FA is a robust single-cylinder diesel engine designed for various industrial and agricultural applications. It features a direct injection system for efficient combustion and reliable performance.

Product Overview

Reliable Industrial Power

The 165FA is a robust single-cylinder diesel engine designed for various industrial and agricultural applications. Featuring a direct injection system for efficient combustion, this air-cooled engine ensures consistent operation in diverse environmental conditions. It is an ideal power source for generators, water pumps, and small machinery, offering reliable performance and durability.

Performance Specifications

Key Performance Metrics

4 HP Min Power	6 HP Max Power	400 cc Displacement	3000 RPM Min Speed	3600 RPM Max Speed
--------------------------	--------------------------	-------------------------------	------------------------------	------------------------------

Technical Details

Cooling Type	Air-cooled
Fuel System	Direct Injection
Starting Method	Recoil Starter

Construction

Key Components

- Cast iron cylinder liner
- Forged steel crankshaft

Applications

Suitable Applications	Generators, Water Pumps, Small Machinery
-----------------------	--
