

Single-Cylinder Diesel Engine EM180

This single-cylinder diesel engine is suitable for various industrial and agricultural applications. It features a robust construction, efficient combustion system, and reliable performance for powering generators and water pumps.

Overview

Robust Industrial Performance

The EM180 is a high-performance single-cylinder diesel engine engineered for versatility in demanding industrial and agricultural environments. Built with a robust construction and an efficient combustion system, this engine is designed to deliver consistent, reliable power for critical machinery such as generators and water pumps. Its air-cooled design and direct fuel injection technology ensure dependable operation and straightforward maintenance for professional users.

Technical Specifications

Cooling System

Air-cooled

Engine Type

Single-cylinder diesel

Fuel System

Direct fuel injection

Performance Metrics

Key Performance Metrics

180 EM

Model Designation

Applications

Compatible Machinery

- Power Generators
- Water Pumps
- Agricultural Machinery
