

# Single-Cylinder Diesel Engine for Agricultural Machinery

This single-cylinder diesel engine is air-cooled with direct injection and a horizontal design. It is suitable for powering small machinery, water pumps, generators, and various agricultural equipment.

## Overview

### Reliable Power for Agricultural Machinery

This single-cylinder diesel engine is engineered for versatility and durability in demanding agricultural and industrial environments. Featuring an air-cooled, direct injection system and a robust horizontal design, it provides consistent power for small machinery, water pumps, and generators. Its reliable performance ensures easy starting and efficient operation in various field conditions.

## Technical Specifications

### Cooling System

Air-cooled

### Engine Type

Single-cylinder, horizontal, 4-stroke

### Combustion System

Direct Injection

### Model Designation

EM190A

## Applications

### Primary Applications

- Agricultural Machinery
- Water Pump Systems
- Portable Generators
- Small Industrial Equipment
