

Single-Cylinder Diesel Engine for Industrial and Agricultural Applications

This single-cylinder diesel engine is engineered for industrial and agricultural use. Its compact design and easy maintenance make it suitable for powering pumps, generators, and other equipment in demanding environments.

Overview

Robust Single-Cylinder Diesel Engine

This single-cylinder diesel engine is engineered for demanding industrial and agricultural environments. Featuring a durable cast-iron block and efficient direct fuel injection, it provides reliable power for equipment such as water pumps and generators. Its compact design ensures easy integration, while the air-cooling system simplifies maintenance for long-term operational stability.

Technical Specifications

Cooling Type

Air Cooled

Model Number

GD190

Fuel Injection

Direct Injection

Block Material

Cast Iron

Applications

Suitable Applications

Water Pumps, Generators, Agricultural Machinery, Industrial Equipment
