

Single-Cylinder Diesel Engine for Industrial and Agricultural Use

This diesel engine is a reliable power source for industrial and agricultural equipment. The single-cylinder, four-stroke engine provides high torque at low speeds and is designed for easy maintenance.

Overview

Robust Single-Cylinder Power

The CJH1105 is a robust and reliable diesel engine engineered for demanding industrial and agricultural applications. This four-stroke, single-cylinder unit features a direct injection system for optimized combustion and a heavy-duty crankshaft designed for extended service life. With its compact footprint and efficient cooling system, it offers versatile integration and consistent performance under load.

Key Performance Metrics

Performance Highlights

1 qty Cylinders	4 stroke Stroke Cycle

Technical Specifications

Core Features

- Direct injection system for optimized combustion
- Heavy-duty crankshaft for extended service life
- Efficient cooling system
- High torque output at low speeds
- Compact design for easy integration

Ideal Applications

Industrial Machinery, Agricultural Equipment, Heavy-Duty Tasks

Maintenance

Maintenance Design

Engineered for simplified maintenance and long-term operational reliability.
