

Single-Cylinder Diesel Engine with Optional Turbocharger

This single-cylinder diesel engine is engineered for industrial and agricultural applications, offering a displacement of 211cc and a rated power of 4 horsepower. The engine features direct fuel injection and an air-cooled design, ensuring reliable performance under demanding conditions.

Product Overview

Robust Single-Cylinder Power Source

This diesel engine is designed for reliability and efficiency in diverse industrial and agricultural environments. Featuring direct fuel injection and an air-cooled design, it maintains optimal performance under demanding conditions. Its construction prioritizes durability and minimal maintenance, making it an ideal choice for generators, water pumps, and small machinery.

Technical Specifications

Rated Power Output

4 hp
Power

Displacement	211 cc
Maximum Speed	3600 RPM
Cooling System	Air-cooled
Fuel Injection	Direct Injection

Features & Compatibility

Suitable Applications

- Generators
- Water Pumps
- Tillers
- Small Machinery

Performance Enhancements	Optional Turbocharger, Enhanced Efficiency, High Throttle Response
