

Single-Cylinder Four-Stroke Engine for Motorcycles and Scooters

This single-cylinder, four-stroke engine is designed for small vehicles. It features a carburetor fuel system, air-cooled design, and a compact, lightweight construction.

Product Overview

High-Efficiency Compact Engine

This single-cylinder, four-stroke engine is engineered for optimal performance in small vehicles like motorcycles and scooters. Its air-cooled, lightweight construction ensures reliable operation and efficient fuel consumption. Designed for versatility, this power unit provides a dependable solution for various light transport applications.

Technical Specifications

Cooling System

Air-cooled

Engine Type

Single-cylinder, four-stroke

Fuel System

Carburetor

Suitable Applications

Motorcycles, Scooters, Small Vehicles

Design Features

Key Design Attributes

- Compact construction
- Lightweight architecture
- Reliable performance output
