

Single-Cylinder Four-Stroke Motorcycle Engine

This single-cylinder, four-stroke engine is designed for small motorcycles and scooters. It features a horizontally-oriented cylinder, overhead valve (OHV) configuration, and air-cooling system.

Overview

Compact Power Solution

This single-cylinder, four-stroke engine is engineered for small motorcycles and scooters. It features a horizontally-oriented cylinder with an overhead valve (OHV) configuration and an efficient air-cooling system. The lightweight aluminum alloy construction ensures excellent heat dissipation and durability for reliable daily use.

Technical Specifications

Cooling System

Air-cooled

Engine Type

Single-cylinder, four-stroke

Starting System

Electric start

Clutch Type

Single auto clutch

Material

Aluminum alloy

Model Designation

K110

Design & Aesthetics

Color

White

Configuration

Horizontal cylinder, OHV configuration
