

Single-Cylinder Four-Stroke Motorcycle Engine

This is a single-cylinder, four-stroke motorcycle engine with an electric starter. It is equipped with a CDI ignition system, a chrome finish, and a foot-operated gear shift lever.

Product Overview

Reliable Power for Small Displacement Vehicles

This single-cylinder, four-stroke motorcycle engine is engineered to provide dependable performance for small displacement motorcycles and scooters. It features an integrated electric starter and a responsive CDI ignition system for seamless operation. With its polished chrome finish and manual foot-operated gear shift lever, it offers both aesthetic appeal and mechanical reliability.
