

Single-Cylinder Gasoline Engine for Agricultural Machinery

This single-cylinder, air-cooled, 4-stroke gasoline engine is designed for powering various agricultural machinery and equipment. It features a recoil starter and an overhead valve (OHV) configuration for improved efficiency.

Overview

Reliable Agricultural Power

This single-cylinder, air-cooled, 4-stroke gasoline engine is engineered for versatility and durability in demanding agricultural environments. Featuring an overhead valve (OHV) configuration, it offers improved fuel efficiency and performance for a variety of small-engine powered equipment. Designed with a cast iron cylinder liner, this unit ensures extended operational life even under continuous use.

Technical Specifications

| | |
|------------------------|--------------------------------------|
| Model Number | WX168F-E |
| Engine Type | 4-stroke, air-cooled gasoline engine |
| Cylinder Configuration | Single-cylinder with cast iron liner |
| Valve System | Overhead Valve (OHV) |
| Starter Type | Recoil starter |

Applications

Suitable Applications

- Sprayers
- Water pumps
- Generators
- Tillers
- Small-engine powered equipment
