

Single-Cylinder Motorcycle Engine with Electric Starter

This is a single-cylinder, four-stroke motorcycle engine with forced air cooling. It includes an electric starter motor and cast aluminum crankcase.

Overview

High-Performance Single-Cylinder Engine

This robust single-cylinder motorcycle engine is engineered for reliability and efficient power delivery. Featuring a 4-stroke design with forced air cooling, it is optimized for consistent performance in various riding conditions. The unit comes fully equipped with an integrated electric starter motor and durable cast aluminum construction, making it an ideal choice for replacement or custom builds.

Technical Specifications

Cooling Method

Forced Air Cooling

Engine Configuration

Single-cylinder, 4-stroke

Starter Type

Electric Starter

Crankcase Material

Cast Aluminum
