

# Single Door Beverage Cooler

This single-door beverage cooler is designed for commercial or residential use. It features a glass door, adjustable shelves, digital temperature display, and integrated LED lighting to maintain optimal temperature for storing and displaying beverages.

## Overview

### Professional Beverage Cooling Solution

This single door upright beverage cooler is engineered for consistent performance in commercial environments. Featuring a forced air circulation system, it ensures uniform internal temperatures to keep drinks perfectly chilled. The unit is designed for durability and ease of use, incorporating a double-glazed glass door with heat film for energy efficiency and clear product visibility.

## Cooling System

Cooling Technology	Forced air circulation (fan-cooling)
Condenser Type	Low-maintenance
Drip Tray	Self-evaporating

## Design & Build

Door Specifications	Double glazed glass, Heat film, Self-closing
Security	Yes
Mobility	Full direction castors with front brakes

## Lighting & Display

Interior Lighting	Standard LED
Control Interface	Digital temperature display
