

# Single Door Compact Refrigerator

This refrigerator features a single-door design and is suitable for compact spaces. It is designed for refrigeration and preservation of food items with adjustable self-positioning hinges and a seamless liner.

## Product Overview

### Compact Single Door Refrigeration

This single door compact refrigerator offers reliable food preservation with a focus on hygiene and insulation efficiency. Designed with advanced high-pressure foaming and a seamless liner, it ensures superior temperature retention while preventing bacteria growth. The unit features a durable, corrosion-resistant embossed aluminum interior and an intelligent drainage system for effortless maintenance.

## Design and Construction

Door Functionality	Self-positioning hinges, Adjustable 30°-70° orientation, Antibacterial mold seals, Oversized airtight gaskets
Liner Material	Extra-thick embossed aluminum

## Performance Features

Insulation Technology	Super dense microporous high-pressure foam
-----------------------	--

## Maintenance and Hygiene

### Sanitation Features

- Seamless internal liner to prevent dirt accumulation
- Advanced spray technology for rust and corrosion resistance
- Dedicated drainage system for easy cleaning
- Anti-leakage insulation protection
