

Single-Door Compact Refrigerator

This compact refrigerator features a single-temperature zone and a vibrant, decorative front panel. It is equipped with adjustable self-positioning hinges and a seamless liner.

Product Overview

Compact Cooling Solution

This single-door compact refrigerator is designed for efficient, space-saving cooling in professional environments. It features advanced insulation technology, including super-dense microporous high-pressure foam, to ensure superior thermal retention. With an easy-to-clean embossed aluminum liner and antibacterial door seals, it prioritizes hygiene and durability for daily use.

Design & Construction

Door Functionality

- Adjustable self-positioning hinges
- 30° to 70° random orientation
- Antibacterial mold-resistant door seals
- Oversized airtight seal for power efficiency

Interior Liner

Extra-thick embossed aluminum

Material Benefits

Pressure resistant, Abrasion resistant, Corrosion resistant, Easy to clean

Technical Specifications

Insulation Technology

Super dense microporous high-pressure foam

Surface Treatment

Advanced spray technology for strong adhesion and rust resistance

Maintenance & Hygiene

Hygiene Features

- Seamless interior liner to prevent dirt accumulation
- Built-in drainage system for easy cleaning
- Anti-leakage insulation protection
