

Single Door Refrigerator with Adjustable Shelves

This refrigerator features adjustable shelves for customized storage of different sized items. It utilizes R600a refrigerant and a high-density foam layer for energy efficiency.

Product Overview

Sophisticated Cooling Solution

This single door refrigerator features a sleek, sparkling silver panel that combines modern European design aesthetics with high-performance cooling technology. Designed for professional utility, it includes a luxury temperature-controlled LED top light and adjustable tempered glass shelving to maximize storage flexibility. The unit utilizes R600a hydrocarbon refrigerant, prioritizing energy efficiency and environmental safety through advanced high-density foam insulation.

Performance & Refrigeration

Refrigerant	R600a
Compressor Technology	High-efficiency, Fluorine-free, Hydrocarbon technology

Design & Build

Maintenance Features

- Removable door seals for easy cleaning
- High-density foam insulation
- Seamless internal structure

Internal Storage

- Adjustable shelving positions
- Transparent storage drawers
- Temperature-controlled LED ceiling light

Shelf Material	Tempered glass
