

Single Door Upright Freezer

This single door upright freezer offers a convenient solution for preserving food and other temperature-sensitive items. It is equipped with adjustable shelves, a digital temperature display, and caster wheels for easy mobility.

Overview

Professional Vertical Freezer

This vertical single-door freezer is engineered with a high-performance forced air circulation system to ensure uniform internal temperature distribution. The unit features an elegant triple-glazed glass door with heat film for optimal insulation and visibility. Equipped with LED lighting and a self-closing mechanism, it is designed for ease of use in commercial environments.

Performance

Cooling Technology	Forced air circulation fan cooling
Key Features	Fan-cooling system, Triple glazed glass door, Self-closing door, LED illumination, Self-evaporating drip tray

Design & Build

Door Construction	Single door, triple-glazed with heat film
Mobility	Full direction castors with front brakes

Maintenance

Maintenance	Low-maintenance condenser
