Overview

Industrial Single Girder Bridge Crane

This single beam overhead crane features a robust structure built with high-strength steel, designed for efficient material handling in industrial settings. It is engineered to work seamlessly with CD1, MD1, and HC model electric hoists, providing a versatile lifting solution for plants and warehouses. With a capacity range of 1 to 20 tons and a span of up to 31.5 meters, it offers reliable performance for light-duty operations.

Performance Metrics

Lifting Capacity

1 ton

Minimum Capacity

20 ton

Maximum Capacity

Working Grade

A3

Span Range

7.5 - 31.5 meters

Operating Conditions

Operating Temperature

-25°C to 40°C

Compatibility

Compatible Hoist Models

CD1, MD1, HC

Safety & Usage

Usage Restrictions

- Do not operate in combustible environments
- Do not operate in explosive environments
- Do not operate in corrosive environments
