Product Overview

High-Performance Single Grouser Track Shoes

Engineered for superior ground penetration and improved traction, these single grouser track shoes are designed to meet the rigorous demands of construction, mining, and forestry sectors. Each unit is fully hardened and tempered to ensure exceptional durability, reduced wear, and reliable performance across various terrains. With integrated mud holes and a clipped corner design, these shoes provide enhanced maneuverability and prevent material packing within the chains for maximum efficiency.

Technical Specifications

Chain Pitch	317 mm
Quenching Treatment (Surface)	HRC42-49
Core Hardness	HRC32
Yellow Paint Thickness	13 um

Applications & Compatibility

Primary Applications	Construction, Agriculture, Mining, Forestry, Quarrying
----------------------	--

Features

Key Design Benefits

- Superior ground penetration
- Longer spike for improved traction
- Integrated mud hole to prevent clogging
- Clipped corners for enhanced maneuverability
- Fully hardened and tempered for reduced wear
